

# Sravan Jaggala

## Business Intelligence Engineer

Power BI Architecture & Governance - Generative BI - Enterprise Analytics

Chicago, IL | +1 (331) 275-9624 | [sravan.jaggala@outlook.com](mailto:sravan.jaggala@outlook.com) | [linkedin.com/in/sravan-jaggala](https://linkedin.com/in/sravan-jaggala) | [sjaggala.github.io](https://sjaggala.github.io)

---

### SUMMARY

Business intelligence engineer with 7 years of client-facing experience architecting, governing, and delivering enterprise Power BI solutions across retail, manufacturing, finance, and supply chain. Known for leading cross-functional teams and owning delivery end to end, from stakeholder requirements through governed, production-grade reporting presented to senior leadership. Currently completing a STEM-designated MS in Business Analytics at the University of Illinois Chicago (Dec 2026), extending deep BI expertise into AI and generative BI: building natural-language, conversational analytics experiences and using Copilot in Power BI to generate and refine reports, pages, and visuals from prompts. Authorized to work in the US on F-1 STEM OPT, with eligibility for the 24-month extension; no immediate sponsorship required.

---

### KEY SKILLS

**Business Intelligence & Semantic Modeling:** Enterprise Power BI, DAX, Power Query (M); star and snowflake schema data modeling; centralized semantic models with documented metric definitions; dataflows for reusable staging and transformation; incremental refresh; query folding and source pushdown for performance; Tableau (basic).

**Governance & Administration:** Power BI Service and tenant administration; workspace and organizational-app lifecycle; row-level security (static and dynamic); on-premises data gateways and gateway clusters; Premium Capacity and Premium Per User licensing; external / B2B content sharing; refresh scheduling and monitoring.

**Platform, DevOps & Integration:** Azure DevOps CI/CD deployment pipelines (PowerShell + Power BI REST APIs) across Dev, QA, and Production; Power BI Embedded Analytics (embed for organization and for customers); REST API automation; SSRS and paginated reports; Microsoft Fabric (hands-on PoC, upskilling).

**AI & Generative BI:** Natural-language and conversational BI (Power BI Q&A and Copilot in Power BI); prompt-driven generation of reports, pages, and visuals; conversational-analytics interface design with AI/ML engineers; applied use of LLM-assisted analytics workflows for dataset preparation and insight validation.

**Databases & SQL:** SQL Server, Oracle, Snowflake, SAP HANA, Google BigQuery; advanced SQL with joins, CTEs, window functions, views, and stored procedures; data validation and reconciliation across source systems.

**Custom Development & Languages:** Power BI custom visuals in ReactJS and TypeScript; DAX, T-SQL, Power Query / M, PowerShell; Python (pandas, matplotlib basics); HTML and CSS.

**Tools:** Tabular Editor, DAX Studio, VertiPaq Analyzer, ALM Toolkit, Power Apps and Power Automate (basics); Jira, ServiceNow, Trello.

---

### PROFESSIONAL EXPERIENCE

**Graduate Hourly** University of Illinois Chicago, Admissions & Recruitment Feb 2026 – Present  
*Chicago, IL*

- Build and maintain CRM dashboards, queries, and reports in Slate and Tableau from admissions data, supporting daily recruitment operations for the College of Business Administration.
- Review prospective-student applications and respond to applicant inquiries, providing reporting and administrative support across daily operations and special projects.

**Senior Technical Consultant** Mouri Tech Apr 2023 – Dec 2025  
*Hyderabad, India*

- Led teams of two to six engineers across concurrent client engagements while contributing hands-on; in the final year functioned as an associate manager, owning delivery direction and team leadership end to end.
- Translated stakeholder requirements into governed, production-grade Power BI solutions for enterprise clients, and presented findings to business users and senior leadership.
- Cut dataset refresh time from 2.5 hours to roughly 7 minutes (about 95%) by redesigning the data model, pushing transformation logic to the source through query folding, and implementing incremental refresh.

- Partnered with Azure DevOps to build Power BI CI/CD deployment pipelines using PowerShell and REST APIs across Dev, QA, and Production, reducing manual deployment effort by about 80%.
- Delivered a phased QlikView-to-Power BI migration of 10 high-visibility, complex reports, reproducing legacy logic and visuals with validated parity.
- Built natural-language Q&A experiences and used Copilot in Power BI to generate reports, report pages, and visuals from prompts, designing conversational report experiences with AI/ML engineers that broadened self-service adoption.
- Co-developed a reusable single-date-picker custom visual in ReactJS and TypeScript, deployed organization-wide; delivered distinctive report UX (pop-out filter panes, dynamic measure and dimension selectors, landing-page and navigation-hub reports) that earned repeated client recognition.

#### **Business Consultant** Blue Yonder

Feb 2022 – Dec 2022

*Hyderabad, India*

- Delivered an embedded-analytics solution integrating Power BI reports into an external Azure application (Copernicus) with .NET developers, using Azure app registrations and REST APIs.
- Diagnosed and resolved embedding, authentication, and access issues by validating configurations and testing report behavior across environments.

#### **Senior Software Engineer** HCL Technologies

Dec 2020 – Jan 2022

*On payroll of Pinaki Softcon Pvt Ltd · Haryana, India*

- Owned end-to-end development and delivery of all Power BI reporting as an individual contributor, and administered the Power BI tenant for a 250+ user base, managing workspaces, gateways, and gateway clusters.
- Stood up a greenfield Power BI environment and migrated the top 100 of 2,000+ Oracle BIEE reports, running proofs of concept to reproduce legacy Oracle functionality; later led the reporting transition from Oracle to Snowflake, updating models and connections for continuity.
- Built governance and audit dashboards by extracting tenant metadata through Power BI REST APIs, automated with PowerShell; ran user training to accelerate adoption.

#### **Technical Advisor** LTI Mindtree

Apr 2019 – Sep 2020

*Client: Microsoft · Hyderabad, India*

- Supported the Microsoft Power BI product for a global user base; promoted to Technical Advisor within six months of joining and led a team of five engineers, sustaining a 4.7+/5 customer satisfaction rating across a high volume of global support cases.
- Resolved advanced development and advisory cases, partnering directly with the Microsoft Power BI product team on complex issues and feature feedback.
- Administered Power BI tenant settings and configured on-premises data gateways as part of enterprise support.

#### **Software Engineer Trainee** Ness Technologies

Feb 2016 – Jun 2017

*Bangalore, India*

- Began as a trainee building and enhancing Power BI reports alongside senior engineers, progressing quickly to independent report development.

---

## **PROJECTS**

### **Arcus Planner** Full-stack productivity web app

[arcus-planner.web.app](https://arcus-planner.web.app)

- Designed and built a full productivity suite: tasks with Kanban and list views, a Gantt planner, calendar, focus board, and a journal with live transliteration, backed by Firebase Authentication, offline-first local storage, Firestore sync, and real-time sharing.

### **AI Agent for Engineering Data Extraction** Graduate Capstone · AI / Generative BI

Fall 2026

*Sponsored by a global industrial manufacturer · Graduate capstone*

- Co-designing an AI agent that extracts engineering data (dimensions, tolerances, part information) from heterogeneous sources, 2D CAD, scanned drawings, PDFs, and 3D models, into one structured, confidence-scored schema by pairing deterministic parsing with vision-language models and human-in-the-loop review.
- Contributed the end-to-end solution architecture and deterministic-versus-AI routing, grounded the approach in published VLM and agentic research, and helped define the per-value confidence and source model.

### **Self-Service BI Platform** In development

- Building a web app where users upload an Excel or CSV file to auto-generate dashboard templates with light customization, plus a natural-language interface to query the data with AI, bringing self-service and conversational analytics to non-technical business users.

---

## COMMUNITY & VOLUNTEERING

**Solution Specialist** Microsoft Fabric Community

Jan 2022 – Dec 2024

Forum profile: [sfrost](#)

- Contributed peer-reviewed solutions to the Microsoft Fabric community forum, resolving analytics, data-modeling, and reporting questions from a global user base.
- Broke down complex DAX, data-model behavior, and query logic into clear, structured explanations.

---

## EDUCATION

**M.S., Business Analytics** University of Illinois Chicago

Expected Dec 2026

GPA 3.9/4.0 · Relevant coursework: Machine Learning, Data Mining, Advanced Database Management, Supply Chain Management, Business Forecasting using Time Series Methods, Healthcare Informatics, Corporate Finance, Optimization.

**B.Tech, Computer Science & Engineering** GATES Institute of Technology (JNTUA)

2011 – 2015

Andhra Pradesh, India

---

## CLIENTS & DOMAINS

**Retail & Distribution:** American Tire Distributors, TBC, Orora Packaging Solutions

**Consumer Products & Manufacturing:** Stanley Black & Decker, Helen of Troy, Insulectro

**Energy & Utilities:** National Grid

**Financial Services:** Hudson Advisors

**Agro-Industrial:** SIPEF

**Technology:** Microsoft (product support)
